

NEXIUS INTELLIGENCE USE CASE: FUND FINANCE INTELLIGENCE

Underwrite and monitor leverage with confidence.

OVERVIEW

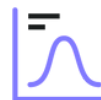

To address the challenge of fragmented data and increasing regulatory pressure, **Nexius Fund Finance Intelligence** provides ABL and NAV lenders with a centralized, market-backed view of borrower and portfolio risk. By unifying internal exposure data with anonymized private credit benchmarks, Nexius eliminates visibility gaps, enabling lenders to underwrite complex structures with confidence, monitor facilities more tightly, and intervene earlier when issues arise.

KEY BENEFITS

Strengthen NAV & ABL credit decisions and support pricing, reserves, and stress scenarios with objective market context

Replace fragmented internal views and subjective assumptions with **objective, market-backed benchmarks** from comparable ABL and fund finance facilities.

Establish a **consistent view of exposure, performance, and covenant health**, reducing gaps that slow underwriting and renewals.

Improve portfolio risk visibility and identify early warning signals using borrower-, facility-, and covenant-level analytics.
